Professional Summary

Passionate software developer dedicated to building clean, responsive websites and intuitive digital solutions. My coding journey was shaped by an exceptional, highly structured learning experience at Evangadi Tech, which provided me with a clear, comprehensive foundation in modern programming. I thrive on translating creative concepts into functional, user-centric applications that solve real-world problems. Committed to continuous growth, I constantly refine my full-stack skills to ensure my work is both impactful and highly efficient.

Technical Skills

Languages & Frameworks: JavaScript (ES6+), React, Node.js, Express, HTML5, CSS3, Bootstrap
Developer Tools & Methodologies: Git, GitHub, RESTful APIs, Front-End Development, Responsive Design

Education

Full-Stack Web Development Program — Evangadi Tech

Acquired deep hands-on expertise in building clean architectures, full-stack applications, and responsive modern web platforms.

Projects

AI-Powered Evangadi Forum Project

Developed a full-featured online forum ecosystem facilitating user interaction, custom topic creation, and highly responsive engagement tools utilizing clear infrastructure structures.

ChatGPT Clone Project

Engineered an interactive conversational interface that mirrors state-of-the-art chat platforms, demonstrating precise control over UI state, external API interaction, and swift frontend responses.

Netflix Clone Project

Built a pixel-perfect front-end recreation of the popular streaming application featuring dynamic media previews, category grouping rows, and complete layouts optimized cleanly for multiple screen sizes.
